If the MC is new to WBCT : WBCT does not process the UIIA updates for a Motor Carrier unless the steamship line has added the Motor Carrier's SCAC and Company Name into the WBCT system (WebTAMS). Once the Motor Carrier is added by the steamship line the first time, then WBCT will begin applying the UIIA updates for the company within their terminal operating system. Once the EP has added the MC to the WBCT system, you will need to update the timestamp on the MC' record.
