RE: Re-design of the GIER Web Portal

This is to advise of some changes to the Global Intermodal Equipment Registry (GIER) web portal. We have recently redesigned the look and feel of the GIER web interface to provide easy access to pertinent information and frequently performed actions for GIER Subscribers. Changes include the following:

1. **GIER Home Page** – The GIER home page has been given a fresh look to provide "quick links" to open invoices, chassis inventory, pending TOC transactions, inactive chassis, chassis queries and reports.

2. **New DVIR Link** – A direct link to IANA's Driver Vehicle Inspection Report Service (DVIR) has been added to GIER for those GIER Subscribers that also utilize IANA's DVIR service. This will allow IEPs a centralized place to access both GIER and DVIR data through the one portal. DVIR functionality available within the new link is the ability for the user to search submitted DVIRs where their company is identified as the IEP.

3. **New DVER Link** - A new link to IANA's Driver Vehicle Examination Report Service (DVER) has also been added to the GIER web platform for those GIER Subscribers that utilize IANA's DVER service. Subscribers will be able to search DVERs submitted where their company is identified as the IEP on the DVER. This further expands the GIER web platform for subscribers that are users of other IANA services.

We will be implementing the new GIER interface on August 22, 2024. Please note that the URL utilized to access the GIER application will be changing with the redesigned GIER web interface. The new URL will be **https://app.gierregistry.com/apps/auth/login.**   If you have the GIER login page saved as a favorite, you will need to make sure you delete the old favorite and use the link above to resave the new URL as your favorite moving forward for accessing GIER effective August 22, 2024.

To follow are a few screenshots of the new GIER interface for your reference Should you have questions once the new GIER interface is launched, please feel free to contact the Info Services Help Desk at (877)523-0225 or via e-mail to **admin@gierregistry.com**. Thank you.
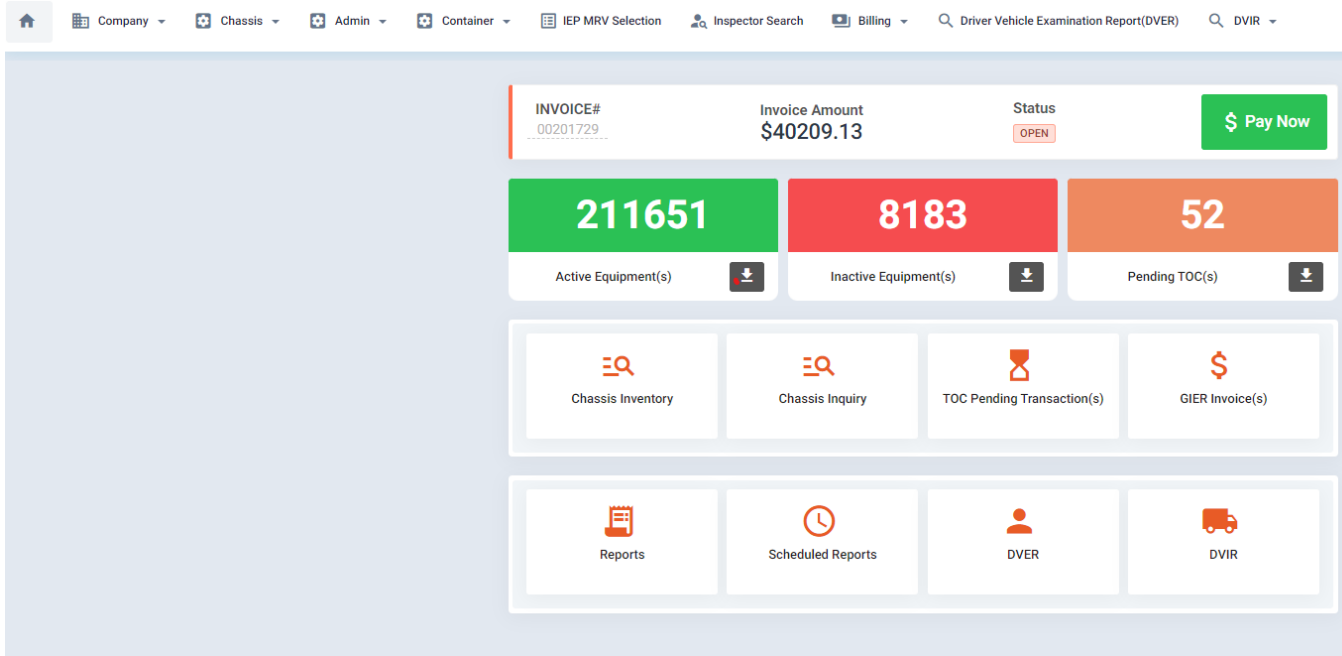

Redesign of GIER Web Portal

GIER Home Page

The redesigned GIER Home page provides quick links to pertinent info for users along with a main menu header with frequently performed actions in GIER:
- Open Invoices
- Number of Active/Inactive Chassis Registered in GIER
- Number of Pending TOCs
- Quick links to Chassis Inventory, Chassis Inquiry, Pending TOCs, GIER Invoices. Reports, Scheduled Reports
- New Links to DVER and DVIR from within the GIER application if the GIER Subscriber also subscribes to these IANA services.

New DVIR Link

The new DVIR Link provides quick access to DVIR data if the GIER Subscriber is also a user of IANA's Driver Vehicle Inspection Report Service (DVIR). Users will be able to search for submitted DVIRs thru the direct connection to IANA's DVIR application.

New DVER Link

The new DVER Link provides quick access to DVER data if the GIER Subscriber is also a user of IANA's Driver Vehicle Examination Report Service (DVER). Users will be able to search and download submitted DVERs.
